# OUR TRAINING MODULE

BASIC

## Basics of Money & Capital Market

Explore the fundamentals of the stock market, including an overview of the Capital Market. Discover the differences between common stocks, preferred stocks, bonds & ETF. Gain insights into Demat and Trading accounts.

## Fundamental Analysis I

Become proficient in the art of fundamental analysis. Learn about business model, balance sheet, PE, EPS, ROC, ROE, Growth Matrix. This approach can provide you with valuable insights into market trends, enabling you to make more informed trading decisions.

## Fundamental Analysis II

Explore Advance Book Analysis from primary stage to secondary stage - IPO, the entire book building process till growth of a company projected. This module emphasizes more on fundamental analysis of a company and its business model. Business Model is the key in understanding the growth and PE Expansion. *(The actual Intrinsic Value)*

## Technical Analysis I

Become proficient in the art of technical analysis. Learn about charting tools, chart patterns, charts formats, time-wise analysis, order management, position slicing, trend analysis, **when to enter and exit into the trade.** *(time-wise, price-wise, trend-wise)*

## Technical Analysis II

Learn advance charting on various charting tools and charting setups. (candlesticks, Heikinashi, point & figure, tubes, renko etc.). Learn advance support & resistance levels for range based trading setups. Plus learn our unique formula of “divided by 4” trade setup.

# OUR TRAINING MODULE

ADVANCE

## Advanced Price Action

Take your trading abilities to the next level with our Advanced Price Action Module. Discover more about institutional trading, forecasting market trends, and master advanced strategies. This module is ideal for both beginners and experienced traders alike.

## Options Buying & Selling Strategies

Delve into sophisticated options selling strategies like iron condors, butterflies, strangles, straddles, ratio spreads, calendar spreads, bulls & bears spreads. These approaches utilize combinations of various options contracts and cater to different market scenarios. Additionally, gain insight into volatility trading strategies, focusing on how to capitalize on shifts in implied volatility and methods for effectively managing volatility and risk. *(Special emphasis on Risk Management)*

## Advance Options Trading

Explore the fundamentals & advance concepts of option trading. Learn complex options greek (Gamma, Theta, Vega etc.) in simplified term.

## Live Mentoring Sessions

Participate in live trading sessions led by experts, where you'll receive real-time updates and strategies. Engage in interactive Q&A sessions to elevate your trading skills to new heights. These live mentoring sessions will not only provide you with essential updates but also equip you with the vital experience needed to navigate the intricate world of financial trading.

## OUR VISION

We aim to offer essential real-world skills and hands-on education. Our goal is to become India's largest financial education platform, targeting over one million active learners by **2025**.

The program provides valuable insights into the regulatory framework and various trading strategies applicable to both Indian and international markets.

*Whether you are a novice or an experienced trader, this course equips you with the essential tools and knowledge required to navigate the complexities of capital market trading effectively.*

## OUR MENTORS
